Calsonic Kansei Established the Second Engineering Center in China

SAITAMA, Japan - November 15, 2013- Calsonic Kansei Corporation (CK) announced the establishment of its new Engineering Center, Calsonic Kansei (Shanghai) Automotive Technology R&D Co. Ltd, Guangzhou Branch. This new Engineering Center is located in the premise of Calsonic Kansei (Guangzhou) Corporation - Headquarters/Huadu Plant in Huadu District Guangzhou, China. Its opening ceremony was held on November 1st.

The new Engineering Center will be CK's core base for vehicle-level design optimization for new models by fully utilizing its location close to the main customers' sites. The Center will also undertake the role to lead the *Monozukuri Competitiveness No.1 Activities* of Guangzhou Region, Zhengzhou Region, and Xiangyang Region. The first Engineering Center, Calsonic Kansei (Shanghai) Automotive Technology R&D Co. Ltd. will enhance its material engineering capabilities as well as product development and the *Monozukuri Competitiveness No.1 Activities* for Wuxi Region, Haimen Region, and Shanghai.
